274 309 20	349 422 10									
310 358 15										
359 432 10										

To use these tables, proceed as follows: The score the higher rated player must attain to win is indicated by the table header (i.e., Table 140). The score the lower rated player needs to win is determined by the difference in the ratings of the two. If a 728 is playing a 670, the difference is 58, which is between 53 and 59. Therefore, the lower rated player must score 95 points to win.
